

ANTI-SLIP DIAMOND TOP

Diamond Top mats provide a "SafeStep" surface with an increased anti-slip coefficient even in wet environments. They are constructed from 100% closed cell recycled re-vulcanized rubber for a more durable and longer lasting mat.

FREEZE & THAW RESISTANT BUTTON TOP

Button Top mats provide enhanced traction and are well suited for climates where freezing and thawing conditions occur. Made from same 100% closed cell recycled re-vulcanized rubber as our Diamond Top mats.
